

PTS Passer

Suture Passer

The Anika PTS Passer helps to reliably pass suture through thick rotator cuff tissue. The side loading jaw is designed to be simple and easy to use, providing surgeons with intuitive operation and consistent control. The active window captures and retrieves suture for a simple one-handed pass. The PTS Passer fits down an 6.5mm cannula.

Features & Benefits

- Side loading jaw for consistent control
- Active window for a simple one-handed pass
