

The Anika ProPass™ Suture Passer helps to reliably pass suture through thick rotator cuff tissue. The side loading jaw is designed to be simple and easy to use, providing surgeons with the intuitive operation and consistent control. The ProPass Suture Passer is offered in two versions; with auto-capture window, or without.

Features & Benefits

- Side loading jaw for easy loading and maneuverability in soft tissue
- Auto-capture window option for simple single-portal pass and retrieve
- Optional ratchet function built-in
- 18mm tissue bite depth
